

AirLife® neonatal care

Helping meet the challenging clinical needs of our most critical newborns

Each newborn has a unique set of needs that must be assessed quickly and efficiently. Our innovative AirLife® neonatal intensive care unit (NICU) supplies and accessories—designed for use with GE Healthcare incubators, warmers, resuscitation systems, and BiliSoft™ phototherapy systems—help enable clinicians to provide exceptional care to the most delicate neonatal patients.

AirLife®

Phototherapy covers

AirLife disposable phototherapy covers help provide simple intensive therapy when newborns present with hyperbilirubinemia. These ultra-soft disposable pad covers and nests are made of flame-retardant fabric gentle on sensitive newborn skin. Designed to help promote skin to skin contact, the pad covers and nests enable comfortable swaddling and much needed support during phototherapy treatments.

Product no.	Description	Qty. (cs.)
For babies less than 1,500 g		
M1093120	Small disposable pad cover	50
