Equipment

ADC
AMERICAN DIAGNOSTIC CORPORATION

THE NEW AMERICAN STANDARD

ADC medical instruments and accessories have been carefully designed to meet the rigorous demands of the most discriminating healthcare professionals throughout the world.

In use on six continents in over twenty different countries, ADC products enjoy a reputation for advanced design combined with skilled craftsmanship.

ADC products are manufactured from the finest materials with an uncompromising concern for quality. Exhaustive inspection of every item by our factory-trained quality control staff ensures strict compliance with ADC standards for performance and durability. And the commitment to manufacturing excellence is backed by the industry's most extensive warranties.

"State-of-the-art" distribution combined with a knowledgeable, courteous staff guarantees that the service you receive will be as outstanding as the products we deliver.

So compare the quality, performance, and most importantly, the value of ADC products to any others you can buy.

You'll discover that there's really no comparison at all!

PULSE OXIMETRY

Pulse oximetry is a non-invasive method to monitor the functional oxygenation of a patient's hemoglobin - the ratio of oxyhemoglobin to all hemoglobin that is capable of carrying oxygen.

Two beams of different wavelengths of light (660nm glow and 940nm near infrared light) are focused onto the human nail tip through a finger-tip sensor. The pulse amplitudes of the red and near infrared signals are detected using photo-electric sensors and run through a microprocessor which converts the readings to numerical values.

ADC's fingertip pulse oximeter combines the unit and sensor in an ultra-compact form.

The feature rich instrument features a bright OLED display, 6 display orientations, multiple brightness settings, graphical display of pulse wave form, audible and visual alarms, and rugged construction.

Finally a fingertip pulse oximeter at a price that makes sense from the leader in core diagnostic products.

PULSE OXIMETRY

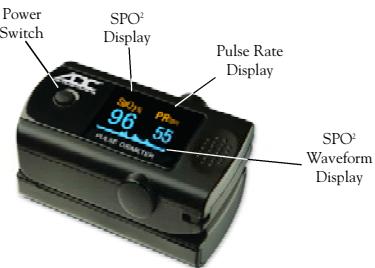

DIAGNOSTIX™ 2100 DIGITAL FINGERTIP PULSE OXIMETER

A portable, battery-operated pulse oximeter for monitoring blood-oxygen and heart rate.

Our new 2100 Fingertip Pulse Oximeter is a simple non-invasive digital device that indirectly measures the oxygen saturation of a patient's blood (SPO^2). The fingertip pulse oximeter digitally displays the percentage of SPO^2 along with the patient's pulse rate in 6 changeable display modes. Perfect for EMS, visiting nurse, or wherever portability is required.

The 2100 features:

- Reads SPO^2 and Pulse Rate
- 6 changeable display modes
- 10 Display brightness settings
- Visual and audible alarms (modes 2-6)
- 25% smaller than competing models
- Bright OLED display
- Hinged battery cover is more secure
- Complete with Carry Lanyard and Black Rubberized Bumper (Optional orange bumper sold separately)
- 2 "AAA" Batteries
- Instruction Booklet
- 2 yr. Limited Warranty

ANEROID SPHYGS

SOURCED GLOBALLY,
ASSEMBLED
LOCALLY.

We contract with the worlds leading manufacturers to produce ADC components to our exacting specifications. Then, using custom built inspection equipment, we subject the components to rigorous testing before the instruments are assembled and packaged in our New York facility. We're one of the few firms to hold our own 510(k) and be classed as a manufacturer of manual bp instruments.

Manometers.

The "Brains" of our sphygs, our manometers are engineered by Nissei, one of the oldest and most respected manufacturers of aneroid gauges. Produced EXCLUSIVELY for ADC in their state of the art facility, the gauges are subjected to rigorous quality control measures before being shipped to us. We then

subject every single gauge to 100% visual inspection for 0 point, and test up to 15% for accuracy. A random sample from every batch is subjected to a destructive endurance test - putting them through 30,000 inflation cycles - 3x the requirements under ANSI SP10. We hold our gauges to accuracy requirements at a minimum of 33% more demanding than the standards demand.

We produce three "types" of aneroid instruments - pocket, palm (one hand), and clock to meet any diagnostic need.

At the heart of every ADC aneroid regardless of type is a movement that is assembled under optimum conditions to ensure it is free of the contamination found in lesser built competitive instruments. The precision crafted movement is heat treated and pre-aged to eliminate hysteresis - the stretching that often plagues cheaper products knocking them out of calibration early in their life. The basic movement is modified to optimize it for use in each of the various models we produce.

Pocket Gauges.

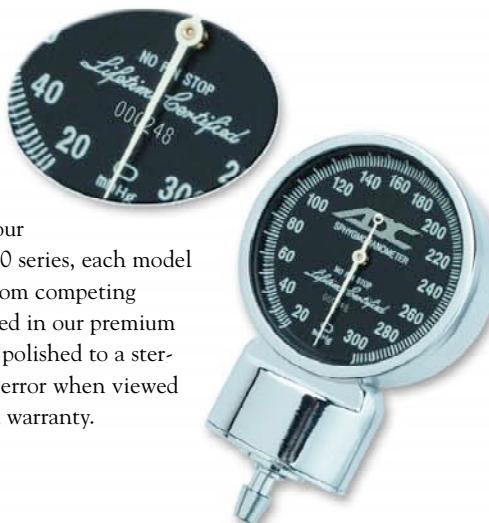

Our most popular design - pocket gauges are offered in a number of models to meet the varying needs and budgets of the healthcare marketplace.

It's all in the details. Die cast zinc housings are heat treated to minimize the impact of ambient temperature variations.

Movements are carefully mounted and tested repeatedly.

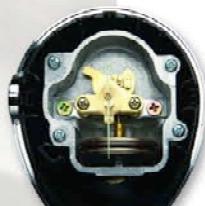

Scale plates are serialized with a code that allows us to identify the production lot. Gauges are meticulously

finished in a baked enamel or a chrome plate. From our basic 809 series manometer to our top of the line 800 series, each model provides a unique feature set that differentiates it from competing models. Our feature rich 800 series manometer (used in our premium 700 series aneroid) boasts a chrome plated housing polished to a sterling shine, extended scale plate to eliminate parallax error when viewed from an angle, luminescent dial, and lifetime calibration warranty.

Palm Gauge:

The palm gauge incorporates both the gauge and bulb and valve into a single assembly making it more convenient to use particularly in multi-cuff solutions. In addition to the premium movement backed by a lifetime calibration warranty, our palm gauge offers the following:

Virtually indestructible Housing:

To help isolate from vibration that often disables lesser built instruments, the new 804's movement is housed in a zinc cage suspended within an impact resistant ABS polymer shell that acts as a shock absorber. We know your manometer will go through a lot so we've engineered it to withstand whatever abuse you dish out.

Versatile trigger valve:

Most palm style sphygs utilize a traditional thumb screw valve that is often difficult to control. Our 804 manometer features a two position trigger air release valve. Infinite control is afforded in deflation mode. When locked in the open position, the valve provides rapid exhaust. And because it's centrally positioned BEHIND the manometer (rather than to one side), it allows for ambidextrous use.

Unsurpassed Ergonomics:

From the manometers new shape which allows it to sit more comfortably in the hand, to the trigger valve, the gauge is designed to fit you rather than the other way around. We even provide a luminescent dial for convenient use in low lighting conditions

Clock Aneroid:

ADC's clock aneroid is available in both wall and mobile platforms. The clock aneroid features a more robust spring to handle the heavier weight of the indicator needle and a special internal air restrictor to reduce "bounce" that causes lesser built clock models to lose calibration prematurely. The specially designed lens cover mounting system prevent dust from entering the manometer and contaminating the movement. Luminescent dial is easy to read in virtually all light conditions.

Cuffs

If the Manometer is the "brains", our Cuff is the "heart" of the instrument. We produce a variety of cuff models to meet the needs and budgets of the marketplace. But regardless of the series, all cuffs are designed to meet the requirements under ANSI SP10 - something many competitive cuffs fail to do.

Our top-of-the line ADCUFF™ is the most feature-rich traditionally bladdered cuff on the market. It is designed for durability and to optimize measurement results.

The ADCUFF™ features:

1 Durability:

We start with 210 denier nylon and custom produced hook and loop adhesive designed to withstand a minimum of 30,000 open/close cycles. Nylon thread sewn at 12 stitches per inch won't shrink when laundered. We randomly test cuffs from each lot on a custom built machine that simulates a lifetime of use in just a few days.

2 Bladder Flap:

Our bladders are held in place with an extra piece of material that prevents bulging or the accidental dislodging of the bladder during use.

3 Gauge Hang Tab:

Allows for a pocket gauge (the most popular type) to be mounted to the cuff for convenience during measurement.

4 Properly Positioned Artery Mark:

Our artery mark is properly positioned to ensure occlusion of the artery during measurement.

5 Range markings:

Guide the user on proper cuff selection.

6 Property of tag:

Allows the cuff to be easily coded to a department or its owner. (not shown)

Inflation bulb and valve:

We produce a number of bulb and valve combinations for rapid inflation and smooth, precise deflation control.

Our end valves are machined from brass and chrome plated. A stainless steel ball bearing provides an air tight seal and long life. Our top-of-the-line ADFLOW™ model features a filter screen to eliminate damaging dust build up.

Our deflation control valves use a time-proven needle seat design that will last the life of the instrument.

Machined from solid brass, the housing is chrome plated while key valve components like the needle and neck are nickel plated for long wear. The larger ADFLOW™ valve boasts a more ergonomic shape that fits comfortably in the hand, and micro threading for more precise deflation control. Filter screen protection eliminates damaging dust build up.

Valves are 100% tested during manufacture for air flow and leakage to ensure compliance with the requirements under ANSI SP 10. Before assembly in our facility we subject a random sample of up to 10% to leak testing.

Domestic Assembly:

We assemble every manual sphyg (unless otherwise noted) in our NY facility. Our assemblers are thoroughly trained and empowered to reject non conforming parts during the manufacturing process.

Final QC with lot coding of every batch ensures that the instrument you receive will work perfectly.

E-SPHYG™

ADC's e-sphyg™ is a revolutionary aneroid sphygmomanometer that replaces a gauge's vulnerable mechanical movement with virtually indestructible digital circuitry. It is to sphygs, what the quartz watch was to timepieces.

The instrument requires measurement using the proven auscultatory method – the same technique in use for well over a century. The only difference is that instead of using a difficult to read, and often out of calibration analog gauge, or potentially dangerous mercury filled instrument, the healthcare professional uses an instrument featuring a bright, back-lit LCD display with 3/4" tall digits in a housing that is both splash and shock resistant. In fact, it is virtually unbreakable. Manometer compatible with virtually any cuff on the market.

Manometer sold separately or in a complete sphygmomanometer with wide selection of inflation system colors and sizes for departmental coding or personal ID.

Lifetime calibration warranty is so comprehensive that if the device EVER needs service we will repair or replace it free of charge.

DIGITAL ANEROID

E-SPHYG™

The world's first digital aneroid sphygmomanometer.

The e-sphyg™ replaces your mechanical gauge and its potentially fragile, vulnerable design, with a virtually indestructible, digital instrument that can stand up to the toughest use.

The e-sphyg™ features:

- Virtually indestructible design can withstand repeated drops of 5 feet or more.
- The E-sphyg gauge (8002) is latex-free
- Extra large backlit LCD with 3/4" digits, is easy to read in virtually any light
- Splash resistant housing for use in harsh environments
- Swivel cuff clip allows the manometer to be re-positioned for easy viewing
- Auto off function conserves battery strength
- Dual low battery warnings
- Recalibration reminder after 10,000 cycles (*recalibration is free for the life of the instrument*)
- Systolic assist alerts practitioner to the onset of Korotkoff sounds – makes a great training aid
- Deflation rate display promotes proper technique in accordance with AHA guidelines
- Pulse rate display at completion of measurement
- Manometer works with virtually every cuff on the market
- Requires familiar and trusted manual auscultation to obtain blood pressure readings (use of stethoscope)
- 2 "AAA" batteries (included)
- May be ordered as a complete sphygmomanometer featuring nylon Adcuff™ inflation system or gauge only for use with existing inflation systems
- Lifetime calibration warranty

COLOR CHOICES

E-SPHYG 2™

The world's first digital mercury sphyg with auto measurement option, makes transitioning to a 21st century device from a traditional mercurial sphyg a snap. The unique backlit LCD display mimics the appearance of a traditional mercury column, but can be easily read in low light conditions. A second numeric LCD displays pressure, pulse, and a host of other vital information. The *e-sphyg™ 2* features auto/manual settings. In manual mode, blood pressure is measured using the traditional, time-tested auscultatory method. Auto mode can be used with child, adult, and large adult size cuffs to automatically obtain systolic/diastolic pressure and pulse in about 1 minute.

The 9002 features:

- GRAPHIC back lit mercury free LCD that mimics the appearance of a mercury column for easier reading
- Multi-function alpha-numeric LCD displays air pressure, deflation rate, systolic, diastolic pressure and pulse (auto mode only).
- Manual mode allows practitioners to use the time-tested auscultatory method with ANY sized cuff. Automatic inflation to pre-set levels simplifies use. ECV (electronic control valve) precisely controls deflation at one of three pre-established rates for optimum results.
- Auto mode obtains readings automatically in about 1 minute
- Automatic inflation and deflation. Manual mode, the operator can select from deflation rates of 2.5, 4.5, or 6.5mmHg/sec.
- NICAD rechargeable battery provides about 200 measurements use on a single charge
- AC adapter
- Available in desktop, wall mount, or mobile configurations
- Choice of single adult cuff or three cuff system that includes child, adult, and large adult
- Available in traditional latex, or latex-free configurations
- Safe, no mercury, clinically proven accuracy

ANEROID SPHYGS

ADC pocket and palm aneroids are available in a number of models and price ranges to meet the varying needs and budgets of today's healthcare market.

State-of-the-art design. Quality construction. Day-in, day-out dependability. Each available in up to six clinical sizes. Adult size in up to 12 cuff colors. Most available completely latex-free.

Select from our top-of-the-line Diagnostix™ brand models or value priced Prophyg™ series. In all, there are six distinct models in over 100 possible configurations. Each unit individually assembled, inspected, and packaged in the U.S.A. to ensure strict compliance to ADC's demanding standards. All units are backed by a minimum 10 year calibration warranty and many models are warranted for LIFE.

DIAGNOSTIX™ 703 SERIES

A versatile palm style aneroid sphygmomanometer that combines precision crafted performance with rugged durability.

The 703 series features:

- Revolutionary palm style manometer (#804) with integral latex-free bulb and trigger style air release valve for one-hand convenience
- Precision crafted 300mmHg no-pin stop Japanese engineered movement tested to 50,000 cycles
- Movement housed in a patented double shell ABS impact resistant polymer casing
- Ambidextrous infinite control trigger release air valve
- Adcuff™ nylon cuff with ADC's proprietary Size Guide™ marking system, prevents mis-cuffing
- Dip molded latex inflation bladder withstands heavy use
- Quick release luer slip connector
- Complete with leatherette carrying case with self repairing nylon zipper
- Assembled, inspected, and packaged in the U.S.A. from foreign components

ANEROID SPHYGMS

**DIAGNOSTIX™ 720 SERIES**

Offering more features than any other sphyg in its class,
the 720 provides our finest value.

The 720 series features:

- Precision crafted 300mmHg no-pin stop manometer with classic black baked enamel finish, exceeds industry standards
- Extended scaleplate graduation marks reduce parallax for easier viewing from virtually any angle
- Adcuff™ nylon cuff with ADC's proprietary Size Guide™ marking system, prevents mis-cuffing
- Dip molded latex inflation bladder withstands heavy use
- Latex inflation bulb, fitted with filter screen end valve to reduce dust build-up

PRO'S COMBOS

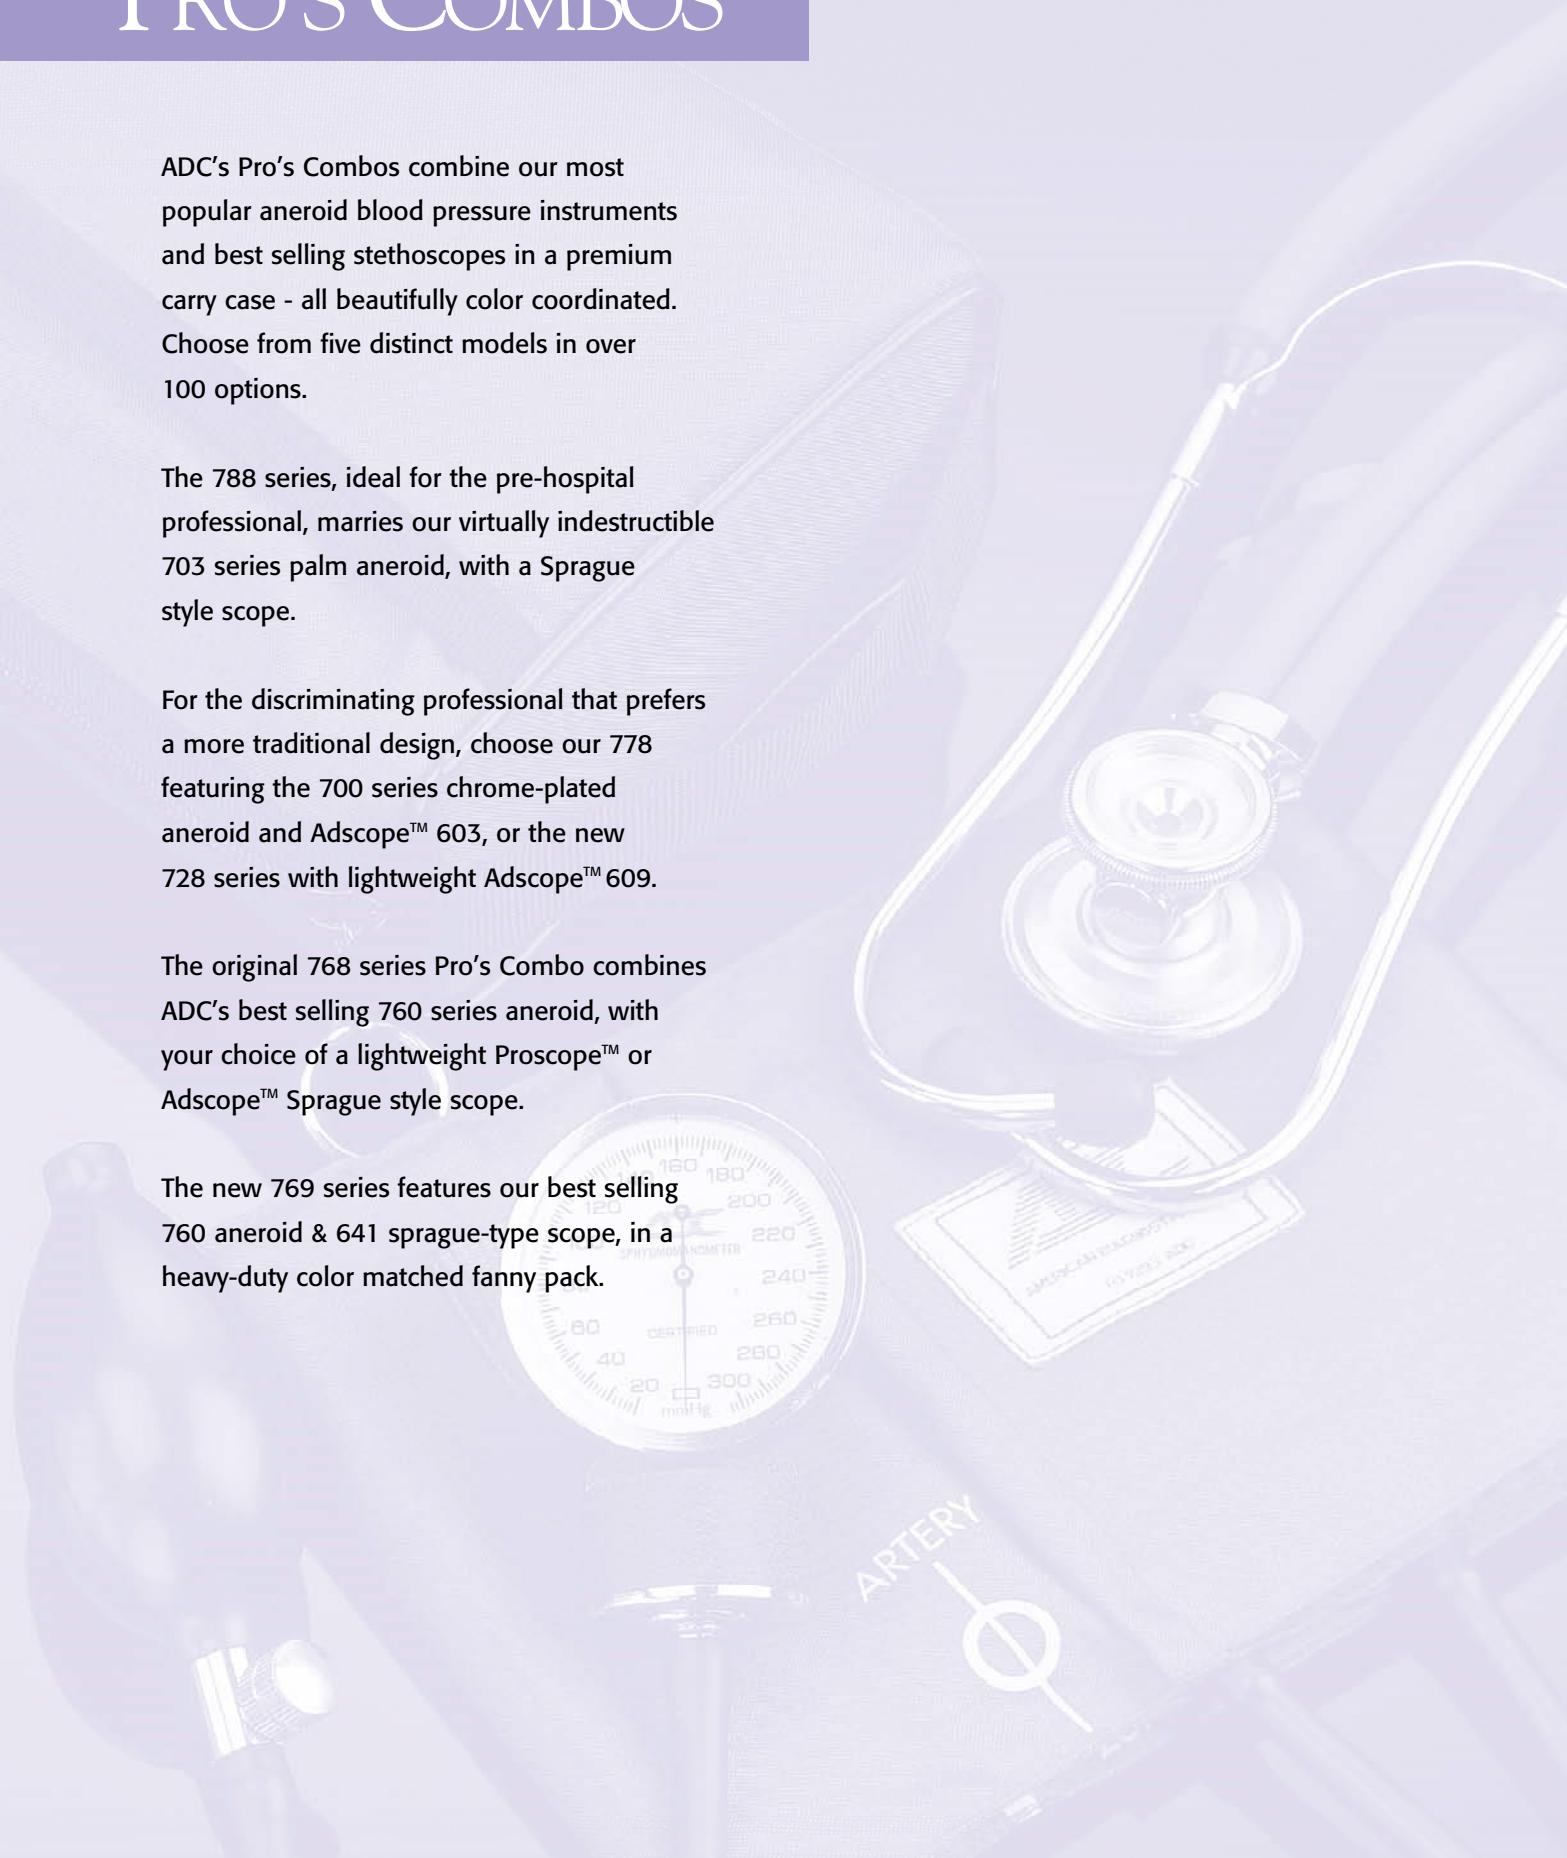

ADC's Pro's Combos combine our most popular aneroid blood pressure instruments and best selling stethoscopes in a premium carry case - all beautifully color coordinated. Choose from five distinct models in over 100 options.

The 788 series, ideal for the pre-hospital professional, marries our virtually indestructible 703 series palm aneroid, with a Sprague style scope.

For the discriminating professional that prefers a more traditional design, choose our 778 featuring the 700 series chrome-plated aneroid and Adscope™ 603, or the new 728 series with lightweight Adscope™ 609.

The original 768 series Pro's Combo combines ADC's best selling 760 series aneroid, with your choice of a lightweight Proscope™ or Adscope™ Sprague style scope.

The new 769 series features our best selling 760 aneroid & 641 sprague-type scope, in a heavy-duty color matched fanny pack.

PRO'S COMBO III PALM ANEROID KIT

The ideal kit for the demanding pre-hospital professional that combines our best selling palm aneroid and Sprague type stethoscope.

The 788 series features:

- The 804 palm style manometer and color coordinated matching professional Adscope™ 641 Sprague Rappaport type stethoscope (page 73)
- 804 gauge with integral latex-free bulb and trigger style air release valve for one-hand convenience
- Precision crafted 300mmHg no-pin stop Japanese engineered movement tested to 50,000 cycles
- Adcuff™ nylon cuff with ADC's proprietary Size Guide™ marking system
- Quick release luer slip connector
- Extra large, color-matched dual pocket carry case (measures 10" x 6" x 3")
- Ideal for nurses, PA's, and EMT's
- Assembled, inspected, and packaged in the U.S.A. from foreign components

MULTICUFFS

ADC's multicuff systems combine a variety of cuff sizes, our revolutionary #804 manometer, and a compartmentalized storage case, permitting the rapid selection of the appropriate cuff.

At the heart of every multicuff system is our #804 series palm aneroid. Double wall, high impact ABS housing, ambidextrous infinite control air release valve, and a precision crafted Japanese engineered movement tested to 50,000 cycles, make it the finest palm aneroid manometer available. Period.

Choose from ultra compact portable or stationary case designs that organize 3, 4, or 5 different cuffs. Two year inflation system warranty. Lifetime calibration warranty.

TO 40.4 CM CIRCUMF.

GENERAL PRACTICE MULTICUFF KIT

A multicuff kit designed for the busy office, clinic, or ER.

The 705 series features:

- One-tube latex inflation bladders and palm style manometer in a compact storage tray
- Rugged gauge features precision crafted Japanese engineered movement housed in a patented double shell ABS impact resistant polymer casing
- Ambidextrous trigger release air valve
- Quick release luer slip connectors
- Four section smoke gray plexiglass tray features a small 14" x 3" footprint
- Tray may be wall mounted with included hardware
- Assembled, inspected, and packaged in the U.S.A. from foreign components

General Practice Multicuff kit series features:

- Adult, Child, and Large Adult Adcuff™ calibrated nylon cuffs

Pediatric Multicuff kit series features:

- Newborn, Infant, and Child Adcuff™ calibrated nylon cuffs

CLOCK FACE ANEROIDS

ADC's clock face aneroid is the ideal Blood Pressure monitoring solution for institutional use. Choose from wall mount or mobile configurations.

High impact housing protects the movement. Ivory color compliments any decor. Six inch luminescent dial is easy-to-read, even in low light conditions. Wall mount swivels 110° on its integral cuff storage bracket. Floor model with its 5 legged weighted caster base is height adjustable from 34" to 48". All units equipped with an 8 foot length (when extended) of coiled tubing for convenience.

Each model available in 6 clinical sizes. Latex-free inflation systems available in five sizes.

Two year inflation system warranty.

Lifetime calibration warranty.

CLOCK FACE ANEROIDS

DIAGNOSTIX™

750 SERIES

A large face aneroid available in 2 configurations that offer the superb precision, styling, and dependability synonymous with the ADC name.

The 750 series features:

- Large, easy-to-read 6" luminescent dial for high visibility in virtually any light condition
- 300mmHg no-pin stop movement withstands the heaviest use
- Adcuff™ inflation system includes the Adcuff™ black nylon cuff, latex inflation bladder, Adflow™ bulb and valve, and eight foot length (when extended) of coiled latex tubing
- Contemporary Euro-style ivory casing complements any decor
- Complete with all necessary hardware and assembly instructions
- Available in Wall or Mobile configurations
- Assembled, inspected, and packaged in the U.S.A. from foreign components

The 750W Wall Aneroid includes:

- Wall bracket that swivels through 110° rotation for easy viewing with integral cuff storage

The 752M Mobile Aneroid includes:

- Height adjustable Spider-Leg™ caster stand with range of 34" to 48" (from bottom of base to top of unit)
- Integral ABS cuff storage compartment
- Manometer angled back 15° for easy viewing
- 18" base diameter

**Some assembly required*

MERCURY SPHYGS

ADC's Diagnostix™ brand mercury Blood Pressure instruments combine legendary accuracy with unprecedented reliability that virtually eliminates the risk of mercury leakage. ADC's proprietary Safety First™ System incorporates a 5.00mm unbreakable plastic cartridge, reservoir lock, and the EZ-Tube™ system. All models are equipped with the Adcuff™ inflation system for optimal measurement accuracy and ease of use.

Striking black housing compliments any decor. Available in desk, wall, or mobile configurations, each is offered with inflation systems in any of six clinical sizes. Latex-free models in five clinical sizes. Two year inflation system warranty. Lifetime calibration warranty.

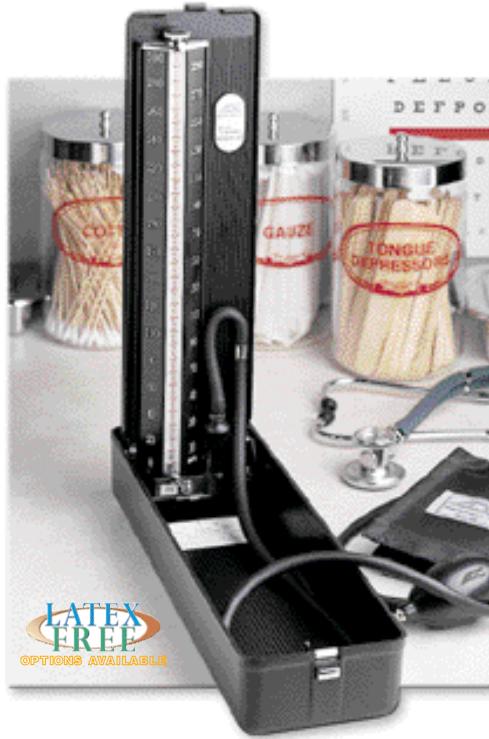

DIAGNOSTIX™ 922 SERIES

A traditional desktop mercury sphygmomanometer that follows in the quality tradition of ADC aneroids.

The 922 series features:

- Rugged die cast aluminum housing with textured black baked enamel finish
- Fold-down cover with spring lock mechanism
- Graduated unbreakable plastic cartridge tube features 4.00mm inside bore for unrestricted, friction-free mercury flow
- High visibility red graduations
- Filter system keeps mercury clean for reliable performance
- Locking reservoir secures mercury during storage, transport, or maintenance
- Adcuff™ black nylon cuff with ADC's proprietary Size Guide™ marking system prevents mis-cuffing
- Dip molded latex inflation bladder withstands heavy use
- Latex inflation bulb fitted with filter screen end valve reduces dust build-up
- Adflow™ chrome-plated brass air release valve
- Lifetime warranty on cartridge tube

SPU CUFFS

ADC's Adcuff S.P.U.TM series single patient use cuffs are available in both adult and neonatal series for virtually any application. Choose from one or two tube configurations with a variety of the most popular connectors for compatibility with most major brands of blood pressure equipment.

All cuffs feature a comprehensive marking system to prevent mis-cuffing, color coded sizes for quick identification, latex-free construction to reduce risk of allergic reaction, and ultra-soft lining for patient comfort. Vinyl material treated with antibacterial agent. Individually polybagged, packed 10 per carton. Made in the U.S.A.

ADCUFF™ ADULT S.P.U. SERIES

- Single patient use cuffs are cost effective and versatile
- Bladderless, latex-free cuff in single or double tube configuration for use with virtually all blood pressure measurement systems
- Wide selection of connectors for compatibility with the most popular manual and electronic monitors
- Six clinical sizes accommodate limbs with circumferences of 8-40cm.
- Each size color coded for stock control and quick I.D.
- Vinyl cuff material impregnated with antibacterial agent to help control the growth of fungus, molds, and bacteria
- Index and range markings help prevent mis-cuffing
- Individually polybagged, 10 per box
- Also sold as complete inflation systems including disposable bulb and valve
- Made in the U.S.A.

ORDERING INFORMATION

Refer to page 50 for ordering information

ADCUFF™ NEONATAL S.P.U. SERIES

- Single patient use cuffs are cost effective and versatile
- Bladderless, latex-free cuff in single or double tube configuration for use with virtually all blood pressure measurement systems
- Cuffs equipped with standard luer slip connectors
- Five clinical sizes (1-5) accommodate limbs with circumferences of 3-15cm.
- Each size color coded for stock control and quick ID
- Vinyl cuff material impregnated with antibacterial agent to help control the growth of fungus, molds, and bacteria
- Index and range markings help prevent mis-cuffing
- Individually polybagged, 10 per box
- Made in the U.S.A.

ORDERING INFORMATION

Refer to page 51 for ordering information

ADCUFF™ S.P.U. ACCESSORIES

- A selection of accessories that facilitate integration of the SPU cuff with most major brands of manual and automatic blood pressure monitors
- Latex-free PVC bulb and valve assembly for use with traditional instruments
- A wide assortment of metal and plastic connectors for compatibility with virtually every major brand of aneroid, mercurial, and automatic blood pressure equipment
- All items sold in packages of 10

ORDERING INFORMATION

Refer to page 50 - 51 for ordering information

BP PARTS

ADC brand sphygmomanometer replacement parts featuring the Prophyg™ and Diagnostix™ precision crafted manometers, Adcuff™ and bladder with Size Guide™ marking system, and Adflow™ bulb and valves, are compatible with most major brands of blood pressure instruments.

Most components individually boxed for greater stock control. Many are available in economical hospital multi-packs.

Inflation system components are warranted for two years. The Prophyg™ Calibration Warranty is 10 or 20 years. Diagnostix™ series manometers are backed by a Lifetime Calibration Warranty.

ADCUFFS™

The most feature rich cuff on the market. Period.

- Durable nylon construction
- Hook and loop adhesive tested to 30,000 cycles
- Proprietary Size Guide™ marking system prevents mis-cuffing
- Gauge hang tab
- Bladder flap for security
- "Property Of" tag
- 6 clinical sizes
- Adult size in 12 fashion colors
- Available separately, with single or two-tube latex or latex-free bladders, or in complete inflation systems
- Assembled in the U.S.A. from foreign components
- Individually boxed
- Available in hospital multi-packs (page 53), black only
- Two year warranty
- ADC cuffs also available in many other designs for home care or specialty requirements (pages 47-49)

DIAGNOSTIX™ & PROSPHYG™ MANOMETERS

ADC's Diagnostix™ and Prophyg™ manometers provide unsurpassed accuracy and dependability.

- Pocket, palm, or clock face design
- 300mmHg no-pin stop movements accurate to within +/-3mmHg
- Prophyg™ models with 10 or 20 year calibration warranty
- Diagnostix™ models with lifetime calibration warranty
- Diagnostix™ pocket models with white scale on contrasting black face for improved visibility
- Extended graduation marks help eliminate parallax error
- Chrome-plated #800 series with luminescent dial
- Diagnostix™ palm aneroid incorporates double wall, high impact ABS housing, ambidextrous infinite control air valve, and Japanese engineered precision crafted movement
- Diagnostix™ clock aneroid features 6 inch luminescent dial for enhanced visibility in any light condition

INFLATION BLADDERS

ADC inflation bladders feature quality construction for uniform pressure and reliable arterial compression.

- Dip molded construction
- Seamless design for rugged durability
- Offered in traditional black latex, or latex-free chloroprene construction in distinctive terracotta coloration for easy identification
- Available in single or two-tube configurations for use with virtually any blood pressure instruments
- 55cm tubing length
- Size and model number printed on bladder for easy stock control and re-order
- Latex models in 6 clinical sizes, latex-free in 5
- Individually boxed
- Available in economical hospital multi-packs (page 53)

BULBS and VALVES

For precise control during inflation and deflation, choose ADC's bulb and valves.

- Dip-molded, seamless construction in traditional black latex, or terracotta latex-free chloroprene
- Regular or extra large size
- Filter screen end valve on Adflow™ models, traditional check valve on Prophyg™ models

Adflow™ valves feature:

- Chrome-plated brass and nickel construction
- Integral filter screen
- Large knurled, smooth-turning, thumbscrew
- Individually leak tested

Standard valves feature:

- Chrome-plated brass construction
- Reliable needle seat mechanism

STORAGE/CARRY CASES

BP carry cases designed to store, organize, and transport your ADC aneroid.

- Made from vinyl, nylon, or polystyrene
- Choose from 5 distinct models available in over 20 options
- Basic zippered cases for traditional pocket or palm aneroids
- Oversized nylon cases with additional storage for scopes or other instruments
- Compartmentalized cases for use with our multicuff systems allow rapid selection of the appropriate cuff

GAUGE GUARDS

Shock absorbers for your pocket aneroid.

- High density synthetic rubber construction helps protect gauge from shock and vibration
- Designed to fit all ADC and MOST brands of pocket style aneroid manometers
- ADC gauge guard is available in bright Orange for added visibility or traditional Black
- Weighs 4 oz.
- Dry natural rubber

GAUGES

- 300mmHg, no-pin stop
- Individually tested to conform to ANSI SP10 standards
- All gauges individually boxed

#886	Coiled Tubing, 4 foot length

HOSPITAL MULTI-PACKS

- Economical multi-packs of 5, 10, or 20 units of our most popular blood pressure accessories
- Available for two-tube bladders, Adcuffs™, and bladders, and a variety of Adflow™ bulb and valve combinations
- May be used with all major brands of blood pressure instruments
- Two Year Warranty

BLADDER HOSPITAL PACK - 2-TUBE

- Dip molded latex or latex-free two-tube bladders for use with virtually all brands of aneroid and mercurial instruments
- Packaged in units of 5 or 10 (depending upon the size)
- Two Year Warranty

STETHOSCOPES

PRECISION MACHINED, HAND ASSEMBLED

ADC produces more stethoscopes than any other US firm. We market our scopes under two brands: Proscopes, primarily for institutional use, are ideal for general assessment and blood pressure measurement. Available in more than 1/2 dozen models in hundreds of model options, all Proscopes retail for less than \$20.

Our top-of-the-line ADSCOPES meet the needs of the demanding healthcare professional. Available in over 12 models from lightweight acoustic and the best selling Sprague, to state of the art digital electronic, we have the right scope for every application, all at prices that make sense.

ADC scopes and components are contract manufactured Exclusively for ADC by some of the worlds leading ISO certified subcontractors.

They are then subjected to a variety of proprietary tests to ensure they meet our demanding standards and our customer's expectations.

A variety of dimensional tests ensure that each component is machined and molded to spec.

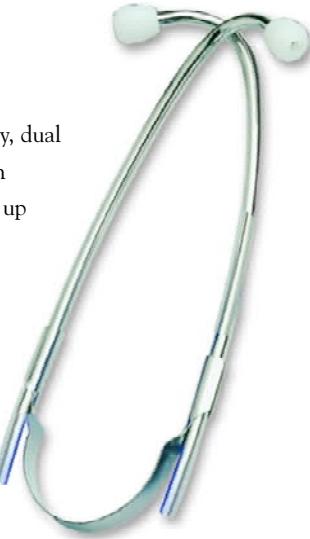

A torque tester ensures that models equipped with adjustable binaurals and combination (dual head) chestpieces perform consistently. Lot after lot.

Finally, our custom made acoustic test machine ensures that each model performs to spec. Acoustic transfer is tested on a random sample from each production lot – whether it's a \$3 disposable stethoscope or a \$250 electronic model. Like our manual BP instruments, we're one of the few firms to hold our own 510(k) and be classed as a full manufacturer.

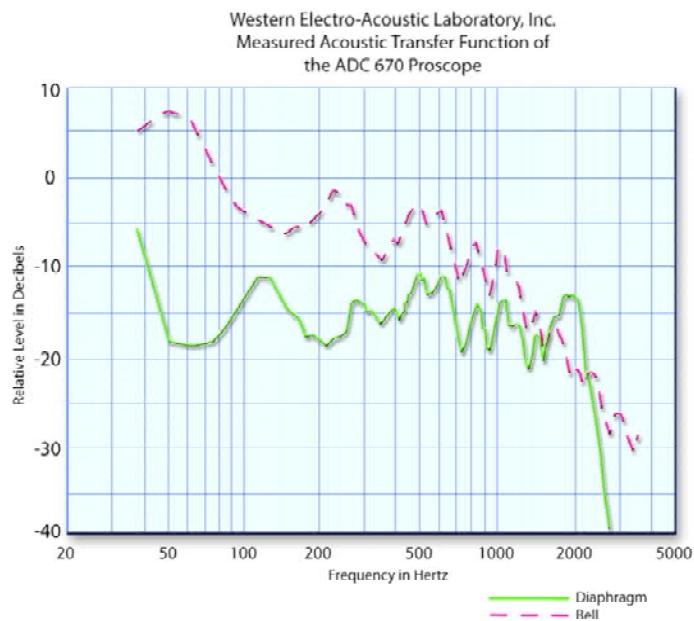

Proscope components.

Binaurals for our lightweight prosopes (bowles, type, diaphragm only, dual head, pediatric and infant) are machined from lightweight aluminum tube stock then anodized for a durable finish. Lighter in weight and up to a half inch longer than competing binaurals, ours are designed to fit the practitioner more comfortably.

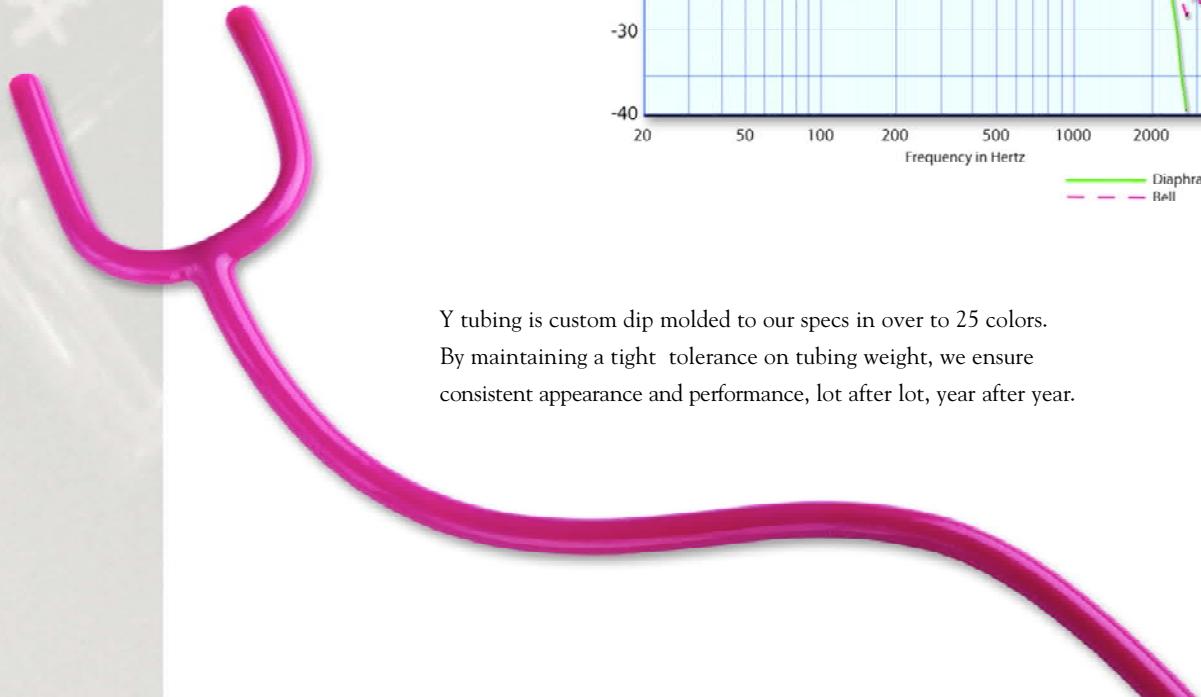

Our diaphragm only (nurse type) and combination (dual head) chestpieces use a proprietary snap on rim and PVC contoured diaphragm for acoustic performance up to 50% better than competing brands.

And we have the independent lab tests to prove it!

Y tubing is custom dip molded to our specs in over 25 colors.

By maintaining a tight tolerance on tubing weight, we ensure consistent appearance and performance, lot after lot, year after year.

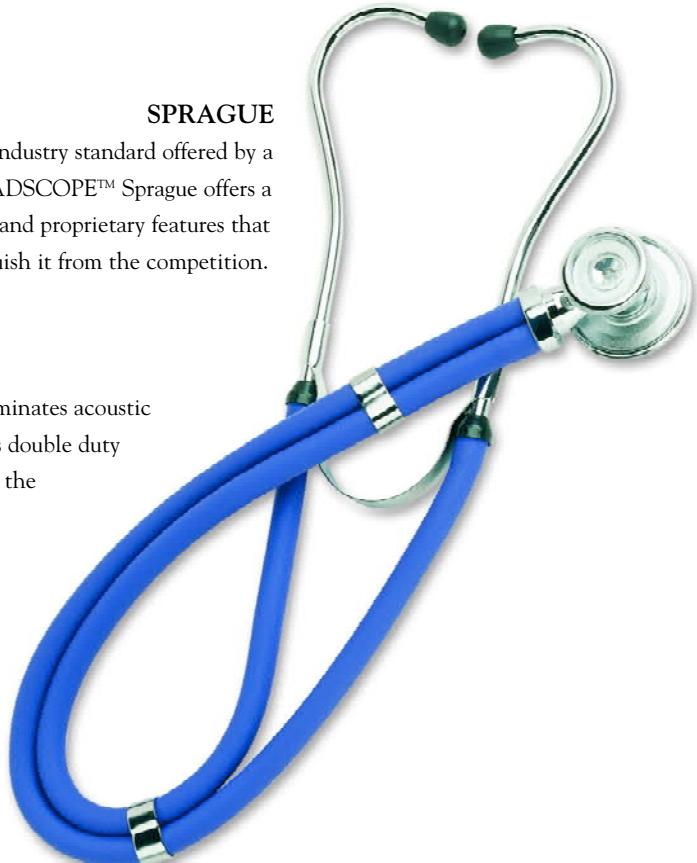

SPRAGUE

Although the Sprague scope is an industry standard offered by a number of importers ONLY ADC's ADSCOPE™ Sprague offers a unique combination of patented and proprietary features that distinguish it from the competition.

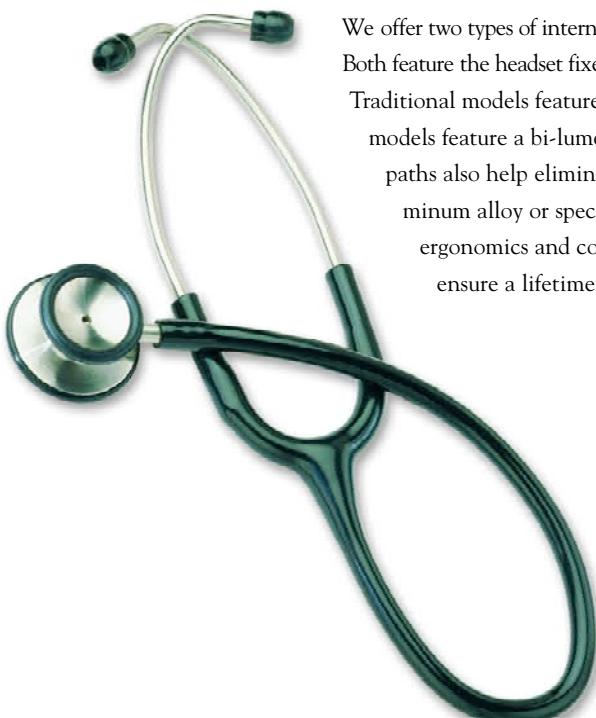

Our patented valve mechanism virtually eliminates acoustic leakage. Our gasketed chestpiece drum does double duty improving both chestpiece acoustic seal and the security of the various chestpiece fittings.

Finally, our unique chestpiece "key" allows the diaphragms to be more easily serviced. Each Sprague is inspected prior to packaging in our New York facility. **EVERY** single one.

ADSCOPES™

We offer two types of internal spring binaural/tubing assemblies on our A D S C O P E S™. Both feature the headset fixed at 15% forward for an anatomically correct fit and improved acoustic seal. Traditional models feature a single lumen with reinforcing yoke to improve durability. Cardiology models feature a bi-lumen design for improved stereo separation of the channels. Separate aural paths also help eliminate sound clutter. Aural tubes are machined from either lightweight aluminum alloy or special stainless steel that is up to 30% lighter for improved practitioner ergonomics and comfort. The concealed tensioning spring is tested up to 100k cycles to ensure a lifetime of use.

Chestpieces on our top-of-the-line ADSCOPEs are CNC (computer numerical control) machined from premium metals like aluminum alloy or surgical stainless steel to precise tolerances – all to provide remarkably consistent acoustic transfer performance lot after lot. Combination models feature an acoustically precise valve stem to eliminate acoustic leakage.

Multi-frequency models use a proprietary gasketed diaphragm that provides both hi and low frequency response simply by altering pressure.

ADSOFT™ threaded eartips provided the ultimate in wearer comfort and acoustic seal. Threaded PVC inserts affix securely to EVERY ADSCOPE™ made over the last decade.

Most ADSCOPE™ models are backed by a LIFETIME warranty on metal parts to protect the purchaser's investment.

ADSCOPE™ ELECTRONIC

ADC's electronic Adscope™ combines impressive amplification with a more traditional acoustic scope appearance for greater acceptance by healthcare practitioners. The scope features robust construction for day-in, day-out dependability, 3 frequency modes and 8 step volume control. Adsoft™ threaded eartips for the ultimate in wearing comfort and acoustic seal. Covered by a two year warranty on electronics.

So compare the quality, features, value, and most importantly, acoustics of an electronic Adscope™ to any other scope available.

You'll discover there's really no comparison at all.

ADSCOPE™ 657

The next generation in electronic stethoscopy combining impressive acoustic amplification, electronic noise filtering and comfortable ergonomic design.

The 657 features:

- Amplifies up to 16x (24db) over traditional acoustic scopes
- Patented piezopolymer film contact microphone provides wider frequency response than acoustic mics used in competing models
- Three frequency modes:
 - Bell (15-200Hz) for cardiac sounds
 - Diaphragm (100-500Hz) for lung sounds
 - Extended Range (15-1000Hz) allows the practitioner widest frequency response
- 8 level volume control with level change tone
- Holds last mode and volume setting for convenience
- Auto-shut off after 3 minutes extends battery life
- Battery warning LED signals when replacement is needed
- Binaurals fixed at 15° angle for snug aural fit
- Specially constructed Adsoft™ PVC eartips for the ultimate in wearing comfort and acoustic seal
- Lightweight and compact – weighs under 6 oz., measures just 28"
- Uses "AAA" battery (included)
- Made in Korea
- 2 year warranty

ADSCOPE™ CARDIOLOGY

ADC's ADSCOPE™ series stethoscopes are recognized the world over for their unrivaled acoustic performance, rugged durability, practitioner comfort and unsurpassed value. And our Cardiology series are our best of the best.

Choose from 3 different Cardiology models – our platinum series featuring a multifrequency diaphragm only chestpiece or our combination diaphragm/bell design in two different models.

All three boast rugged stainless steel construction for ALL metal parts, a bi-lumen Cardiology style headset, and ADSOFT™ threaded eartips for the ultimate in wearing comfort and acoustic seal.

And all Cardiology models are backed by a Lifetime warranty on the metal parts.

The ADSCOPE™ Cardiology Series.
Incredible design.
Affordable price.

ADSCOPE™ 600 PLATINUM EDITION

The ultimate acoustic stethoscope.

The 600 features:

- Unique design that combines the acoustic response of a traditional bell and diaphragm into a convenient one-sided chestpiece
- Light pressure for low bell-type frequency, firm pressure for diaphragm type high frequency
- Chestpiece precisely machined to exacting tolerances from surgical stainless steel for outstanding performance and rugged durability
- Non-chill diaphragm retaining rim for patient comfort
- Large internal bore stainless steel binaurals are fixed at 15° angle for greater comfort and acoustic seal
- Custom molded extra thick bi-lumen 19" PVC tubing stays soft and flexible
- Internal binaural spring construction reduces bulk and prevents kinking when folded without producing sound clutter
- Includes one pair of plastic eartips and Adsoft™ PVC eartips (small and large) for the ultimate in wearing comfort and acoustic seal
- Scope ID Tag included
- Weighs 7.5 oz.
- Overall length 27"
- Lifetime Warranty on metal parts

ADSCOPE™ 601

A convertible scope that combines the versatility of our Sprague with the acoustic excellence of our 602.

The 601 features:

- Threaded chestpiece drum allows rapid conversion from a pediatric diaphragm to an adult bell
- Chestpiece precisely machined to exacting tolerances from surgical stainless steel for outstanding performance and rugged durability
- Extra deep bell for unsurpassed low frequency response
- Ultra-sensitive diaphragms for greater amplification and crisper high frequency transmission
- Non-chill bell and diaphragm retaining rims for patient comfort
- Large internal bore stainless steel binaurals are fixed at a 15° angle for greater comfort
- Custom molded bi-lumen 19" PVC tubing stays soft and flexible
- Extra-thick tubing walls minimize extraneous noise
- Double leaf internal spring construction reduces bulk and prevents kinking when folded
- Complete with one pair of PVC eartips and Adsoft™ deluxe PVC eartips in small and large sizes for the ultimate in wearing comfort and acoustic seal
- Complete with an accessory case containing the adult bell, 2 spare diaphragms, and two sets of eartips
- Latex-free
- Scope ID Tag included
- Weighs 9 oz. (adult bell) and 10 oz. (pediatric diaphragm)
- Overall length 28"
- Limited Lifetime Warranty on metal parts

ADSCOPE™ CLINICIAN

ADSCOPE™ Clinician series scopes are the most feature-rich precision crafted professional line of scopes on the market. Fabricated from premium materials like surgical stainless steel or aluminum alloy, these scopes combine lightweight comfort and outstanding acoustic performance with incredible value.

Choose from 7 different models and over 50 model options. Multifrequency designs in which the diaphragm can be used for both high and low frequency sounds simply by altering the pressure; and traditional combination diaphragm/bell models. Available in adult, pediatric, and even infant size to suit the practitioner's requirements. With warranties from 5 years to Lifetime on the metal parts depending upon the model.

So compare the quality, features, value and most important, acoustics of an ADSCOPE™ to any other scope available.

You'll discover there's
really no comparison
at all.

ADSCOPE™ 615 PLATINUM PROFESSIONAL EDITION

Our best multi-frequency scope yet.

The 615 features:

- Combines the acoustic response of a traditional bell and diaphragm into a convenient one-sided chestpiece
- New gasketed diaphragm enables the scope to achieve multi-frequency response simply by altering pressure
- Light pressure produces bell-type low frequency response
- Firm pressure will produce diaphragm-type high frequency performance
- New ovoid shaped chestpiece improves ergonomics
- Chestpiece made from lightweight zinc alloy plated with an attractive satin finish
- Non-chill diaphragm retaining rim for patient comfort
- Satin finished stainless steel binaurals
- Double leaf internal spring fixed at 15° angle for greater comfort
- Reinforcing yoke molded into flexible 22" PVC "Y" tubing
- Adsoft™ deluxe PVC eartips in small and large size for the ultimate in wearing comfort and acoustic seal
- Spare diaphragm included
- Scope ID Tag included
- Weighs 5.4 oz.
- Overall length 30.5"
- Lifetime Warranty

PLATINUM EDITION ADSCOPE-LITE™

The lightweight version of our world famous multi-frequency scopes now in both adult and pediatric sizes.

The Platinum Edition Adsopce-lite features:

- Combines the acoustic response of a traditional bell and diaphragm into a convenient one-sided chestpiece
- Gasketed diaphragm alters its effective size and frequency response simply by changing pressure
- Bell-type low frequency response is achieved by simply holding the chestpiece in place with light pressure
- Firm pressure will produce diaphragm-type high frequency performance
- Sculpted chestpiece made from lightweight zinc alloy plated with an attractive satin finish
- Aluminum binaurals in satin finish
- Double leaf internal spring fixed at 15° angle for greater comfort
- Reinforcing yoke molded into flexible 22" PVC "Y" tubing
- Adsoft™ deluxe PVC eartips for the ultimate in wearing comfort and acoustic seal
- Spare diaphragm included
- Scope ID Tag included
- Overall length 30.5"
- Lifetime Warranty

SPECIAL EDITION ADSCOPES™

Combining legendary acoustics with classic styling, ADC's special edition gold plated Adscopes™ are as striking as they are functional.

Both Special Edition ADSCOPES™ feature:

- Generous plating of metal surfaces with 5 microns of 18 karat gold, polished to a brilliant shine
- Choose from the Platinum Edition Multi-frequency scope (page 59), or our best selling Sprague type scope with interchangeable chestpiece fittings (page 73)
- Special edition gold plated Adscopes™ packaged in a beautiful zippered nylon gift case
- One year warranty on finish, lifetime on performance

ADSCOPE™ 600GP features:

- Multi-frequency chestpiece that allows frequency selection by altering chestpiece pressure
- 19" bi-lumen tubing with integral spring
- Binurals fixed at 15° angle for greater comfort
- Includes accessory case containing two pairs of Adsoft™ PVC eartips, traditional firm eartips, and scope ID Tag
- Weighs 7.5 oz.
- Overall length 27"

ADSCOPE™ 645 features:

- Classic Sprague style scope with convertible chestpiece and 5 interchangeable chestpiece fittings for unsurpassed versatility
- 22" dual tube design for improved stereo separation
- Accessory pouch containing 3 bell chestpieces, two pairs of eartips, spare diaphragm, and proprietary chestpiece key
- Weighs 8 oz.
- Overall length 30"

SPRAGUES™

The legendary design features of the Sprague have made it one of the most popular scopes in history. Acoustic sensitivity. Unrivaled versatility. No wonder its been the scope of choice for EMS and nursing professionals year-in and year out. ADC's proprietary Sprague design incorporates features found on NO other Sprague scope on the market resulting in a scope that outperforms and outlasts look-alikes.

Choose from a number of models in traditional 2 tube or lightweight single tube design in dozens of color options. All backed by ADC's no hassle 5 year warranty.

So, if you're in the market for a Sprague, demand not just any Sprague type scope – demand an ADSCOPE™ Sprague.

SPRAGUE SCOPE

Our exclusive design features an improved valve mechanism that virtually eliminates acoustic leakage and a chestpiece key to facilitate after market service.

The ADC Spragues feature:

- Threaded chestpiece drum of chrome plated zinc permits the use of five interchangeable chestpiece fittings - an adult and pediatric diaphragm, and three bells (1/4", 1", 3/4") - for complete diagnostic capability in most patients
- Latex-free, double tube configuration
- Proprietary valve mechanism eliminates acoustic leakage
- Adjustable chrome-plated brass binaurals
- Convenient 22" tubing length in choice of 29 fashion tubing colors
- Complete with an accessory pouch containing the bell chestpieces, chestpiece key, 2 spare diaphragms, one pair of mushroom eartips, and one pair of silicon eartips
- Weighs 8 oz. / Overall length 30"
- 5 Year Warranty
- Inspected and packaged in the U.S.A.

INSTITUTIONAL

ADC manufactures more institutional scopes than any other firm anywhere. And there's a reason. Proprietary design features that differentiate these value priced instruments from any other on the market. Like longer binaurals for a more comfortable fit. Or our proprietary diaphragm/rim design (adult models) that improves acoustic performance by up to 50%.

With over 7 models in dozens of color and packaging options to choose from, we're sure to have the Proscope™ model you need to meet your budget.

And virtually every Proscope™ model is still inspected and packaged in the U.S.A.

PROSCOPES™

ADC Proscopes™ combine lightweight comfort, sensitive acoustics, and handsome styling, with truly affordable pricing.

The Proscope™ Series features:

- Choice of diaphragm only (660 series) or combination (670 series) chestpiece
- Lightweight aluminum chestpiece construction
- Non-chill diaphragm rim for patient comfort
- Proprietary diaphragm enhances acoustic response by 50% over traditional designs
- Adjustable aluminum binaurals with PVC eartips
- Flexible 22" PVC tubing
- Spare pair of black mushroom eartips included
- Inspected and packaged in the U.S.A.
- Choice of 21 tubing colors
- One Year Warranty

Proscope™ 660 series features:

- Non-chill diaphragm only nurse style chestpiece (1³/₄" dia.)
- Ideally suited for blood pressure measurement
- Weighs just 3 oz.
- Overall length 32"

Proscope™ 670 series features:

- Combination diaphragm/bell chestpiece for wide frequency response
- Diaphragm diameter 1³/₄", bell diameter 3/₄"

- Non-chill bell ring and diaphragm for patient comfort
- Weighs 3.5 oz.
- Overall length 32.5"

DIGITAL THERMOMETERS

ADC offers one of the largest selections of cost effective electronic thermometry products to meet a wide variety of clinical settings.

We now offer two tympanic models, seven "stick" type models, 2 thermometry kits, and an innovative low cost conductive model. We also produce thermometer sheaths and covers in a variety of packaging options compatible with ADC and most other brands of digital stick thermometers.

Our one second tympanic models are available in probe cover-free design (ideal for home use), and a model that uses disposable probe covers designed for the professional markets.

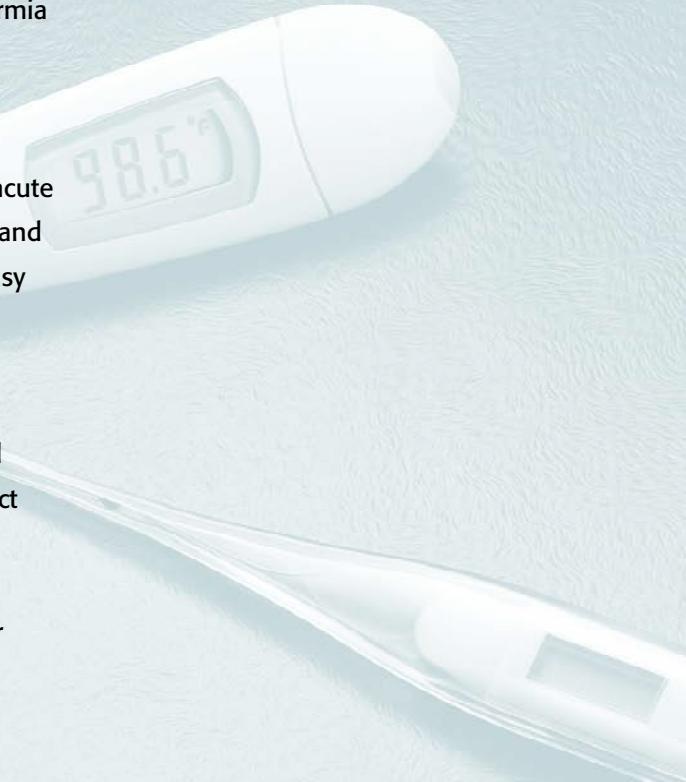

We offer a wide range of digital "stick" models from a super low cost 60 second mercury replacement model to super fast read 8 second models. We even offer specialty models for hypothermia and veterinary applications.

ADC's SPU kits combine our most popular stick models with a supply of sheaths in a convenient wallet and are ideal for the acute care sector. Our newest kit offers both oral and rectal models and a box of sheaths in a counter top display that's ideal for the busy physician's office or clinic.

Finally, our newest thermometer is a conductive temporal thermometer that combines non-invasive technology and rapid 6 second measurement with ultra-low cost making it the perfect solution for newborn and pediatric applications.

All models offer convenient dual scale readouts, auto off, water resistance, last reading memory and come with a battery.

All meet the accuracy requirements under ASTM E1112 or ASTM E1965.98 Standards.

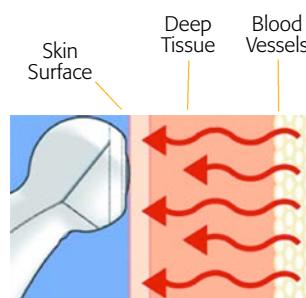

ADTEMP™ 427 TEMPLE TOUCH THERMOMETER

Provides an accurate 6 second non-invasive temperature reading at the temple making it ideal for pediatric patients. Cost effective design makes it ideal for institutional use.

ADTEMP™ 427 Temple Touch thermometer features:

- Non-invasive temple temperature measurement using patented conductive technology delivers clinically accurate readings in about 6 seconds
- Reduces the risk of cross contamination and avoids the need for costly probe covers
- Ideal for the hospital, clinic, or physician office
- Auto off function conserves battery life
- Audible tone when measurement is complete
- Last reading memory
- Dual Scale (°F/°C)
- Water Resistant
- Large backlit display
- Uses 2 "AAA" batteries (included)
(Minimum 1000 full duty cycles over 24 month period)
- Temp range 95°F to 107.6°F +/- .2°F (35°C to 42°C +/- .1°C)
- Compact design measures just 4.7" x 1.17" x 1"
(12.0 cm x 3.0 cm x 2.4 cm)
- Weighs 1.3oz (37g) including batteries

DIAGNOSTICS

Choose from our line of full size 2.5 volt diagnostic instruments or compact pocket sets depending upon your need. Or your budget.

Full size instruments available in the most popular configurations including Otoscope, Otoscope/Ophthalmoscope set, or Complete instrument set with nearly a dozen popular attachments. Sets come in a fitted case for storage. ADC's 2.5 volt Otoscope is available in a veterinary model as well.

Halogen illuminated Dermascope for examination of skin lesions.

ADC's Pocket Series Diagnostic Instruments include both an Otoscope and Ophthalmoscope. Xenon illumination and compact size make these indispensable instruments for today's busy practitioner. Choose from four models.

All ADC Otoscopes will accommodate Welch Allyn Kleen Spec disposable ear specula for the ultimate in convenience and affordability.

Full size instruments covered by a 1 year warranty.
Optics on pocket sets covered by a Lifetime warranty.

POCKET INSTRUMENTS

Full featured pocket otoscope and ophthalmoscope that sacrifice nothing but size.

Pocket Otoscope instrument head features:

- 2.5v Xenon light source for true tissue color and long lasting lamp performance
- Fiberoptics for cool, obstruction free light transmission
- Wide angle, swivel 2.5x viewing lens permits instrumentation
- Welch Allyn disposable polypropylene ear specula in 2.75mm and 4.25mm sizes are convenient, safe, and economical
- "AA" metal battery handle interchanges with pocket Ophthalmoscope
- Pocket clip with integral on/off slide switch for ambidextrous use
- Complete instrument includes tube of 5 each 2.75mm and 4.25mm specula
- Lifetime Quality Performance Guarantee on optics

- 19 lenses from -20 to +20 diopters for better resolution

- Illuminated dial
- Rubber brow rest prevents scratching of eyeglasses
- Lifetime Quality Performance Guarantee on optics

5110E

Pocket Instrument handle features:

- Pocket clip with integral on/off slide switch for ambidextrous use
- Powered by "AA" metal batteries (included)

Pocket Ophthalmoscope instrument head features:

- 2.5v Xenon light source for true tissue color and long lasting lamp performance
- 5 aperture selections (small aperture, large aperture, fixation aperture, semicircle aperture, and red-free filter)

ORDERING INFORMATION

#5110N	Pocket Otoscope/Ophthalmoscope Set
#5110E	Economy Pocket Otoscope/Ophthalmoscope Set

POCKET OTOSCOPE

Full featured pocket otoscope that offers high quality optics and workmanship.

The 5111N series features:

- 2.5v Xenon light source for true tissue color and long lasting lamp performance
- Fiberoptics for cool, obstruction free light transmission
- Wide angle, swivel 2.5x viewing lens permits instrumentation
- Includes 5 Welch Allyn disposable polypropylene ear specula in 2.75mm and 4.25mm sizes are convenient, safe, and economical
- Pocket clip with integral on/off slide switch for ambidextrous use
- Complete instrument includes tube of 5 each 2.75mm and 4.25mm specula
- Lifetime Quality Performance Guarantee on optics

ORDERING INFORMATION

#5111N	Pocket Otoscope
--------	-----------------

POCKET OPHTHALMOSCOPE

Full featured ophthalmoscope that sacrifices nothing but size.

The 5112N series features:

- 2.5v Xenon light source for true tissue color and long lasting lamp performance
- 5 aperture selections (small aperture, large aperture, fixation aperture, semicircle aperture, and red-free filter)
- 19 lenses from -20 to +20 diopters for better resolution
- Illuminated dial
- Rubber brow rest prevents scratching of eyeglasses
- Pocket clip with integral on/off slide switch for ambidextrous use
- Lifetime Quality Performance Guarantee on optics

ORDERING INFORMATION

#5112N	Pocket Ophthalmoscope

ADC COMPLETE 2.5v INSTRUMENT SET

A full featured 2.5v set with 5 different instruments in a fitted case.

The complete set features

- Bayonet locking mounts for each instrument head to allow secure connection to the battery handle
- "C" cell powered, satin finish chrome-plated battery handle with knurled finish
- Rheostatic on/off switch
- Complete in zippered case with fitted foam insert that is scuff and scratch resistant and cleans easily
- Weighs 23½ oz
- Inspected and packaged in the U.S.A. from foreign components
- Batteries NOT included

Otoscope

- Chrome-plated Otoscope head with removable 4x magnifying lens, and insufflator fitting
- Auto-clavable, polypropylene ear specula in 2.5mm, 3.5mm, and 4.5mm sizes
- Adapter to allow use with Welch Allyn or compatible disposable specula
- Nasal speculum adapter with manual screw opening for instrumentation connects to the otoscope head

- Welch Allyn disposable polypropylene ear specula in 2.75mm and 4.25mm sizes are convenient, safe, and economical

Ophthalmoscope

- Ophthalmoscope head with lens wheel featuring 24 corrective lenses from -25 to +40 diopters

Bent Arm Illuminator

- Chrome-plated bent arm larynx and nasopharynx illuminator for lighting the oral cavity and pharyngeal area
- One 3.0mm and one 4.0mm mirror with integral tongue depressor holder that attaches to the illuminator
- One tongue depressor attachment for the illuminator
- One disposable tongue depressor adapter for the illuminator

ORDERING INFORMATION

#5215	Complete 2.5v Diagnostic Instrument Set
-------	---

ADC STANDARD 2.5v DIAGNOSTIC SET

Competitively priced 2.5v Diagnostic Set in a fitted case.

The ADC 2.5v diagnostic set features:

- Ophthalmoscope head with lens wheel features 24 corrective lenses from -25 to +40 diopters
- Otoscope head with removable 4x magnifying lens, and insufflator fitting
- Bayonet head locking mounts for secure connection to the battery handle
- Welch Allyn disposable polypropylene ear specula in 2.75mm and 4.25mm sizes are convenient, safe, and economical
- "C" cell powered battery handle with rheostatic on/off switch
- Auto-clavable, polypropylene ear specula in 2.5mm, 3.5mm, and 4.5mm sizes
- Adapter to allow use with Welch Allyn or compatible disposable specula
- Complete in zippered case with fitted foam insert that is scuff and scratch resistant and cleans easily
- Weighs 20 oz.
- Inspected and packaged in the U.S.A. from foreign components
- Batteries NOT included

ORDERING INFORMATION

#5210	Standard 2.5V Diagnostic Set
-------	------------------------------

STANDARD & VETERINARY OTOSCOPE

An affordable otoscope that offers high quality optics and workmanship.

The 5211 series features:

- German 2.5v lamp for bright illumination
- Bayonet locking otoscope head
- Removable 4x magnifying lens
- Rheostatic on/off switch
- Autoclavable, polypropylene ear specula in sizes 2.5mm, 3.5mm, and 4.5mm
- Veterinary model includes 4mm, 5mm, and 7mm specula sizes
- Knurled brass handle with a beautiful satin finish
- Compact instrument measures just under 7 1/2" and weighs approximately 7 oz.
- Powered by 2 "C" cell batteries (not included)
- Comes with zippered leatherette storage pouch that holds the otoscope and included specula
- Inspected and packaged in the U.S.A. from foreign components
- One Year Quality Performance Guarantee

ORDERING INFORMATION

#5211	Standard Otoscope
#5211V	Veterinary Otoscope

ADC 2.5v DERMASCOPE

Skin surface microscope for detecting lesions.

The ADC 2.5v Dermascope features:

- Bright 2.5v halogen illumination and 10x optic system ensure true tissue color for accurate identification
- Removable contact plate is auto-clavable
- Large knurled focusing ring
- Comfortable soft synthetic rubber eyepiece
- Reticle contact plate etched onto the lens in mm permits easy measurement of suspicious lesions
- Instrument head with Bayonet locking mount for secure connection to the battery handle
- "C" cell powered battery handle with rheostatic on/off switch
- Satin chrome-plated handle with knurled finish for a positive grip
- Complete with nylon zippered pouch that holds the instrument and spare contact plate
- Inspected and packaged in the U.S.A. from foreign components
- Batteries NOT included

LARYNGOSCOPES

ADC offers a broad line of Satin™ Brand laryngoscopes in single patient use or reusable models with either traditional or fiber optic illumination.

Our new SPU blades and handle are the lowest cost disposable laryngoscopes on the market. With an MSRP under \$10 for blade and handle combined, these innovative instruments use fiber optic type light transmission with low cost "green" LED illumination for a price less than it typically costs to disinfect reusable instruments. Blades available in both Mac and Miller profiles in the most popular sizes.

Our Satin™ Brand reusable blades are available in popular curved Macintosh, straight Miller or Wisconsin (standard illumination only) profiles in sizes 00 to 4. Lightweight chrome plated brass handles available in up to 3 sizes. Fiberoptic models available in Mac and Miller profiles and feature a removable light pipe for simplified disinfection and longer life.

All Satin brand reusable blades feature stainless steel construction with a satin finish for unsurpassed performance and durability.

Order reusable component individually or in complete sets featuring a full selection of blades and handles in a fitted case. Each Satin™ reusable laryngoscope is inspected and packaged in the USA and includes a one year warranty.

Every Satin laryngoscope component is fully compatible with all major brands of laryngoscopes conforming to ASTM F965 or ISO 7376-1.

MACINTOSH DISPOSABLE FIBEROPTIC

- Polycarbonate construction
- Fiberoptic light transmission provides cool, obstruction free viewing
- Featuring the 3 most popular curved blade sizes (2-4)
- Individually hermetically sealed, 20/carton

CPR

ADC's expanded line of CPR products and resuscitation aids combine ADC's tradition of innovation with our commitment to value.

Choose from Berman or Guedel airways each providing a variety of packaging options from bulk to kit packed.

Our new line of Adsafe™ faceshields and valve mask are also available in an incredible number of options.

Adsafe™ faceshields are available with or without a one way valve. The basic Adsafe™ is available in bulk dispenser pack or individual foil pack – ideal for teaching institutions or first aid applications. Also available individually packaged in handy colorful pocket keychains for convenience. Adsafe™ Plus with one way valve available in a compact, splash resistant keychain clamshell that measures a mere 2" x 1^{1/2}" x 7/8". Ideal for pocket, purse, glove box, or trauma kit.

The Adsafe™ CPR Pocket Resuscitator combines functionality with portability. Equipped with a filter protected, replaceable one way valve, it folds flat into a compact, splash-resistant clamshell storage case that measures just 5" x 4^{1/3}" x 1^{1/2}".

BERMAN DISPOSABLE AIRWAYS

The Berman Oropharyngeal Airway features:

- Smooth polyethylene airway with reinforced bite block
- Color coded for easy identification
- Single use
- Latex-free
- Non-sterile
- 6 sizes, embossed in mm on airway
- Available in pkgs of 12 or 100 each in polybag or boxed set of 6

ADSAFE™ CPR POCKET RESUSCITATOR

The Adsafe™ CPR Pocket Resuscitator combines functionality with portability. Equipped with a filter protected, replaceable one way valve, it folds flat into a compact, splash-resistant clamshell storage case that measures just 5" x 4 ½" x 1 ½". Quick accessibility, dual invertable use, and multiple connectability make this resuscitator an essential addition to your CPR equipment needs.

The Adsafe™ CPR Pocket Resuscitator features:

- High efficiency and low resistance one-way valve minimizes the possibility of cross-contamination
- 15mm O.D. connector can be attached to any standard ventilation and oxygen equipment
- For use on adults, and inverted for infants/children
- Ergonomically shaped mask with soft-air cushion for leak-free performance, easy grasp, and patient comfort
- Disposable valve to avoid cross contamination
- Elastic green strap to keep mask in-place on patient
- Latex-free
- Operating instructions, disposable latex-free gloves, and alcohol wipe included
- Pocket storage case

CASEWARE

Over the next 3 pages you'll find an impressive selection of belt holsters, pocket organizers, and medical bags, all produced to ADC's unrivaled standards of quality and ergonomic ingenuity.

Choose from belt holsters that secure just a few instruments to models that hold a virtual tool kit. Each sewn from super-tough nylon synthetics.

You can select a pre-stocked set loaded with just the right instruments or design your own "custom" set by ordering the case and individual components separately.

ADC's medical bags boast durable 600 denier nylon construction, compact design, and an impressive assortment of pockets.

RESPONDER™ HOLSTER

The world's best selling nylon holster, the #204 is made of super tough 600D nylon for unsurpassed durability.

DIAGNOSTIC PENLIGHTS

ADC® offers a wide range of ADlite™ diagnostic penlights from cost effective disposable models to a super premium model CNC machined from brass.

The ADlite™ Pro is our top-of the line diagnostic penlight using LED technology that will virtually never burn out. Innovative power switch won't accidentally light in the pocket.

The Adlite™ II and Metalite™ are two low cost reusable penlights.

Our Adlite™ and Adlite™ Plus disposable penlights provide a cost effective solution to examining pupillary reflex. Available in a variety of colors and packaging options.

ADLITE PRO™ 355BK

Our finest pocket light, the ADLITE Pro is the physician's choice for evaluation of the pupillary reflex.

The ADLITE PRO™ features:

- LED lamp for bright, white illumination for true tissue rendering
- LED lamp provides 10,000 hours of use eliminating the high cost of replacement lamps
- Durable CNC machined brass housing in a striking black matte finish
- Measures 5 $\frac{1}{8}$ " long, $\frac{1}{8}$ " diameter
- Positive feel power switch
- Convenient Pocket Clip
- Complete with 2 "AAA" batteries and an attractive gift box
- Lifetime warranty on lamp cartridge, 2 year warranty on penlight

INSTRUMENTS

ADC surgical instruments, tools, and accessories are made to our exacting specifications in order to withstand the rigors of daily use.

Over the next 4 pages, you'll find a wide selection of the most popular instruments and specialized tools for a variety of practical applications.

From scissors and hemostats of surgical stainless steel to the world's best selling Medicut™ shears and window punches, we have the products needed to get the job done.

Finely crafted products all backed by the industry's most comprehensive warranties.

MEDICUT™ SHEARS

Available in two sizes, ADC's Medicut™ Shears are the world's best selling brand of medical grade utility shears.

Medicut™ Shears feature:

- Razor sharp, super-hardened surgical stainless steel blades with one serrated edge to cut through the toughest materials
- Blades tempered to a Rockwell hardness of C56 for unsurpassed durability
- Contoured polypropylene handles with large ring provide maximum control and comfort
- Extra large rivet with a rated strength of 88kg assures rugged durability
- Fully auto-clavable to 143°C (290°F)
- Available in traditional 7¹/₄", or smaller 5¹/₂" length
- Inspected and packaged in the U.S.A.
- Two Year Quality Performance Guarantee
- CE marking

Medicut™ Shears feature:

- Traditional 7¹/₄" length for maximum leverage and strength
- Stainless steel safety bandage tip

MiniMedicut™ Shears feature:

- Smaller 5¹/₂" length is ideal for cutting bandages, tape, and clothing
- Polypropylene safety bandage tip color coordinated to the handle

ADTOOL™

A compact multifunctional tool that is indispensable to the pre-hospital care professional.

- 10 function tool in a compact folding design
- Stainless steel construction
- Includes pliers, wire cutter, 2" knife blade, 3 flathead screwdrivers of varying sizes, can opener, 2" serrated blade, bottle opener, and phillips head screwdriver
- Folds to 4" length
- Nylon sheath with webbed belt loop
- Lifetime warranty

ORDERING INFORMATION

#372 Adtool™

**WINDOW PUNCH**

The only punch specially designed to shatter tempered auto window glass for extrication.

- 40% more punching power (minimum 26 lbs.)
- Specially hardened replaceable steel tip tempered to a Rockwell hardness of C60 resists dulling
- Force is adjustable by twisting rear cap for precise control
- Lightweight corrosion resistant aluminum barrel has a knurled finish for positive grip
- Removable pen-type pocket clip
- Length 5", diameter 5/8"

ORDERING INFORMATION

#360 Window Punch

TAPE MEASURE

The 396 features:

- Tape enclosed in compact container
- Measures in inches and centimeters (60"/150cm)
- Push button in back to rewind tape

ORDERING INFORMATION

#396	Woven Tape Measure
------	--------------------

EKG RULER & CALIPER

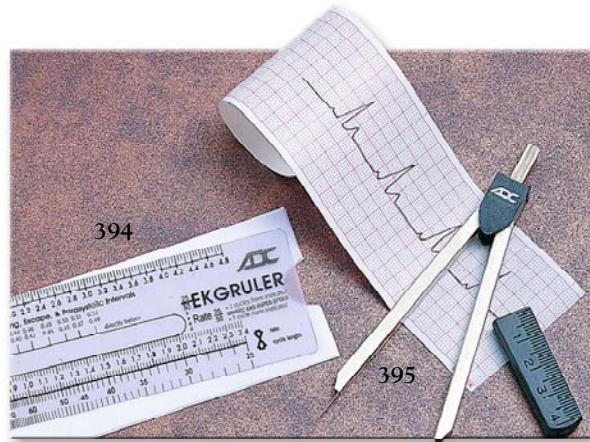

Two of the most popular electrocardiograph accessories.

The EKG Ruler features:

- Seconds scale for PR, QRS, Cycle, Length, Coupling, Escape, and Parasytopic Intervals
- Measures just $1\frac{11}{16}$ " x $6\frac{3}{8}$ " small enough to fit in a medical coat pocket
- Complete with protective sleeve

The EKG Caliper features:

- Hardened steel arms and points for accurate measurement of tracing intervals
- Point protector has built-in 40mm metric scale
- Measure $4\frac{3}{4}$ "

ORDERING INFORMATION

#394	EKG Ruler
#395	EKG Caliper

TOURNIQUETS

- Gum rubber tourniquet with Velcro® type contact closure
- Adjusts to any tension desired for clinical or first aid use
- Adult, Child, or Leg sizes
- Latex-Free

ORDERING INFORMATION

A TRADITION OF QUALITY AND INNOVATION...

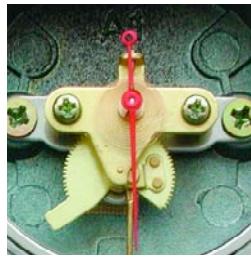

Over the past two and a half decades, American Diagnostic Corporation has emerged as the leader in value priced premium quality diagnostic products for the healthcare industry.

Here's why...

The Finest Components

ADC products are manufactured from the world's finest components utilizing state-of-the-art technologies and boasting proprietary features not found anywhere else.

Features, like gasket sealed chestpieces, Adsoft™ PVC eartips, the Adcuff™ with Size Guide™ marking system, and our remarkable gauge movements that withstand the toughest use. Proprietary features that combine to provide unsurpassed performance and robust durability.

Movement in our aneroid gauge

Gasket sealed chestpieces

To ensure an unwavering commitment to uncompromising quality, each and every stethoscope and sphygmomanometer is assembled, inspected, and packaged in the USA.

Gauge endurance test machine tests manometers to 30K cycles

All in all, we subject our components to dozens of the most rigorous tests to ensure you get products of unsurpassed performance and rugged durability.

Cuff hook & loop adhesive test

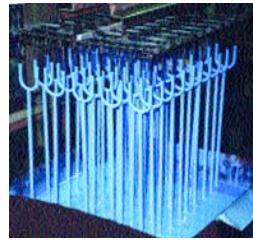

Valve leak test machine

It starts with the best design...

Each component is meticulously designed to meet our exacting standards and the demanding needs of our customers.

But it doesn't end there!

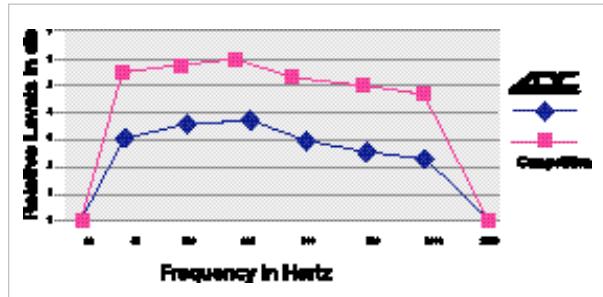

We then subject virtually every component to rigorous quality control using custom built testing equipment. Gauge endurance test machines that subject our manometers to 30,000 cycles in just a few days. Valve and bladder leak test machines. Cuff hook and loop adhesive endurance test machines. Thermometer baths that ensure our digital thermometers meet every international standard. Dimensional tests that ensure every component measures up to its original design specifications.

Molding of scope tubing

Compare the performance...

Don't just take our word for it. Compare the performance, features, or durability of any ADC product to any other on the market. Then compare the price. You'll soon discover there's simply no comparison at all!

Acoustic leakage test comparing ADC Sprague to competing models

WITH DEDICATION TOWARD THE FUTURE.

Because of our commitment to provide the very highest quality product and service, ADC has earned ISO 13485:2003 and ISO 9001:2000 certification.

The ISO 13485:2003, a certification standard specifically written for medical device manufacturers, was awarded to ADC on August 12, 2005. The broader ISO 9001:2000 certification by TUV Rheinland, was presented on September 2, 2005, while the SCC ISO 13485:2003 certification, recognized by the Canadian regulatory authority, was awarded on September 27, 2005.

The ISO 13485:2003 standard is specifically written for medical device manufacturers while the broader ISO 9001 quality management standard is sought after by any firm committed to quality. The designations were earned from TUV Rheinland, a leading international standards, testing registration, and certification organization. ISO certification is a way to differentiate suppliers, particularly where consistency of product and reliability is crucial.

ADC's ISO certification ensures that we build quality into our products and services and avoid costly after-the-fact inspections, warranties, and rework. As an ADC customer, our steadfast dedication to the ISO process provides you with these benefits:

- **services designed to meet your needs and ensure your satisfaction**
- **products manufactured with quality planned and documented in every step of the process**
- **team of trained employees, performing consistently with the goal of continuously improving all operations**
- **our commitment to you to do what we say we will do**

Everyone at ADC is part of the ISO experience — marketing, sales, accounting, customer service, shipping/receiving, and manufacturing. It is not just a manufacturing system, but a company-wide way of doing business that puts the needs of our customers at the center of all we do. ISO certification is not a one-time event — it is just one step in a continuous quality improvement process.

What is ISO?

ISO, the International Organization for Standardization, is a worldwide federation of national standards bodies from over 140 countries. The purpose of ISO is to promote the development of standardization and related world activities to facilitate the international exchange of goods and services, and to develop cooperation in intellectual, scientific, technological, and economic activity.

The American National Standards Institute (ANSI) represents the United States in the International Organization for Standardization. It is a private, nonprofit membership organization composed of private and public sector organizations, and was a founding member of ISO. ANSI does not develop American national standards but facilitates their development by establishing consensus among qualified groups. ANSI also has a role in governing the ISO.

What are the Standards?

The ISO 9000 family of standards represent an international consensus on "good manufacturing practices." When adhered to, these practices ensure that the certified company can consistently deliver products or services that meet requirements for quality and timeliness of delivery.

An independent auditor, who verifies that the processes influencing quality conform to the relevant standard's requirements, provides ISO 9000 certification. The objective is to give a company's management and customers confidence that the company is in control of the way it does business.

Why be ISO Certified?

While no organization must be ISO 9000 certified, it has become a standard for conducting business in the international arena. In fact, ISO 9000 is the only quality system accepted internationally. Many companies in the European Community have become ISO certified and many are requiring their suppliers prove that they have a quality system, such as ISO, in place as a condition of purchase. To keep this certification, a company must maintain this commitment and incorporate a process of continuous improvement and customer satisfaction...

and that is our commitment to you!

HOW TO USE THIS CATALOG

The ADC catalog is designed for easy reading. Products are grouped by major category and generally organized by subcategory within each group for fast location. The following guidelines will assist readers unfamiliar with the layout of the catalog.

1. **Categories:** ADC products are divided into distinct groups - Pulse Oximetry, Sphygmomanometers, Sphygmomanometer Parts, Stethoscopes, Thermometers, Diagnostics, Laryngoscopes, CPR, Caseware, Instruments, Neurological, Penlights, and Instruments. Within larger groups, (like scopes) products may be divided into subcategories as well. (*Scopes are divided into "top-of-the-line" ADSCOPES™ and economical PROSCOPES™.*) Color key tabs in the right hand margin permit quick location of the desired category.
 2. **Table of Contents:** Page 3 lists by product category.
 3. **Model Number Index:** If only the ADC number is known, the complete model number index on pages 131-136 references the page number within the category where every ADC product may be found.
 4. **Ordering Charts:** Our newly enhanced ordering charts make part number lookup much easier. They incorporate part numbers, latex content, and color options in one handy chart.
 5. **Product Feature Charts:** Our Product Feature Charts (PFC), highlight features, specifications, and replacement parts for the major product categories. The ADC product number is in the left hand column. The various features, replacement part names, and specifications most frequently requested are in the top row. To find the desired information, locate the intersection of the row (with the desired model number) and the column (with the desired replacement part or feature).
- For example, to find the ADC model number of the bladder on the #703, lookup the intersection of the row containing the #703 and the column entitled Bladder (page 38). ADC replacement part #820 is shown at the intersection. Therefore, the #820 is the replacement bladder for the #703.*
6. **Product Feature Icons:** New icons identifying a product's major features are used throughout the book. The inside back cover foldout provides a reference to all icons for easy identification.
 7. **Color Chart:** A larger view of a printed representation of a product's color is printed on the inside back cover foldout. It is a ready reference for easily looking up specific products.

ORDERING INFORMATION						
Color/Size	Adult	Newborn	Infant	Child	Lrg. Adult	Thigh
Black	#703	#703N	#703I	#703C	#703X	#703T
Adult cuffs also available in: Black - BK, Burgundy - BD, Dark Green - DG, Gray - G, Green - GR, Magenta - M, Navy - DB, Orange - OR, Purple - V, Red - R, Royal Blue - RB, Teal - TL						
Latex-free options available on items with terracotta shading. To order latex-free version, ADD "LF" suffix to model number (i.e., 703LF)						
COLOR CHOICES						
BK	BD	DG	G	GR	M	
DB	OR	V	R	RB	TL	

LATEX CONTENT

Virtually all the items in this catalog, except blood pressure units, are latex-free.

Latex Content: Sphygmomanometers - bladder, bulb, and coiled tubing on all standard blood pressure units contain latex. All other sphygmomanometer components (gauges, valves, zipper case, etc.) are latex-free. Latex-free options are available on most sphygmomanometers. The ADC homecare line of manual and digital units are latex-free. Latex-free options are indicated with a **terracotta coloration** ■ as shown in the **Ordering Chart** above.

All stethoscopes, thermometers, laryngoscopes, diagnostics, CPR, Instruments, and caseware products are 100% latex-free unless otherwise indicated.

ADC, ADCUFF, ADFLOW, ADSAFE, ADSCOPE-LITE, ADSOFT, ADTEMP, ADSCOPE, ADVANTAGE, DIAGNOSTIX, E-SPHYG, E-SPHYG, HYPOTEMP, MEDICUT, MINIMEDICUT, POCKET PAL, POCKET PAL II, POCKET PAL III, METALITE, MULTIKUF, PROSCOPE, PROSPHYG, RESPONDER, RESPONDER JR, Size Guide, System 5, and Satin, are trademarks of American Diagnostic Corporation. All rights reserved.

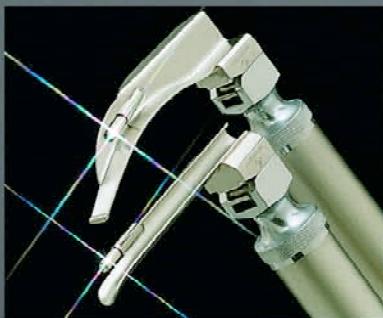

No part of this catalog may be reproduced in whole or part without the express written permission of ADC.
